

Aside - Pendo Implementation Fixes Required

Date: October 30, 2025

Tester: Meredith

Application: textaside.app + textaside.com

REMAINING ISSUES TO FIX

1. SIGN-UP PAGE BUTTONS (textaside.com) - HIGH PRIORITY

Status:  NOT IMPLEMENTED

Issue: Squarespace code injection script was not added

Console verification:

javascript

Send text button data-pendo: null

Download button data-pendo: null

Required Fix:

1. **Add JavaScript to Squarespace:**
 - Go to Squarespace Settings → Advanced → Code Injection → Footer
 - Add the JavaScript code that adds data-pendo attributes to both buttons
 - Should target SMS button and download button
2. **Verify implementation:**
 - Check for console logs when script executes
 - Verify buttons have data-pendo attributes after script runs

Impact: Cannot track signup page engagement or conversion funnel

2. MODAL BACKDROP FIX - CRITICAL BLOCKER

Status: ❌ FIX APPLIED TO WRONG ELEMENT

Issue: CSS fix was applied to `.modal-backdrop` but app uses Radix UI with different structure

Console proof (with modal open):

Modal pointer-events: auto ✅ (correct)

Overlay pointer-events: auto ❌ (WRONG - should be 'none')

Root Cause: Overlay intercepts clicks, blocking Pendo Visual Design Studio from tagging buttons inside modals

Required Fix:

CSS

/ Target the correct Radix UI overlay element */*

```
[data-state="open"] {  
  pointer-events: none !important;  
}
```

/ Ensure modal content still clickable */*

```
[role="dialog"] {  
  pointer-events: auto;  
}
```

Test After Fix: Should be able to tag buttons inside modals with Pendo Visual Design Studio

Impact: Blocks tracking of ALL modal interactions (Save, Cancel, Close buttons, etc.)

3. SOCIAL MEDIA EMBEDS - MEDIUM PRIORITY

Status: ❌ NOT IMPLEMENTED

Console verification:

Found 1 Instagram embed

- class: EmbeddedMedia ✅

- href: <https://www.instagram.com/reel/...> ✅

- data-pendo: null ❌ (should be 'content-external-link-btn')

Required Fix:

- Add `data-pendo="content-external-link-btn"` to `a.EmbeddedMedia` elements
- Apply to ALL embed types:
 - Instagram: `a.EmbeddedMedia`
 - YouTube: Similar wrapper elements
 - TikTok: Similar wrapper elements
 - All other social media embeds

Impact: Cannot track social media embed engagement

VERIFICATION COMMANDS

After fixes, use these to verify:

1. Test Signup Buttons:

```
javascript
// On textaside.com
console.log('Send text button:',
document.querySelector('a[href^="sms:"]')?.getAttribute('data-pendo'));
console.log('Download button:',
document.querySelector('a[href*=".vcf"]')?.getAttribute('data-pendo'));
```

2. Test Modal Backdrop:

```
javascript
// With modal open
const overlay = document.querySelector('[data-state="open"]');
console.log('Overlay pointer-events:', overlay ? getComputedStyle(overlay).pointerEvents :
'N/A');
```

3. Test Social Media Embeds:

```
javascript
// On page with embeds
const embedLinks = document.querySelectorAll('a.EmbeddedMedia');
console.log('First embed data-pendo:', embedLinks[0]?.getAttribute('data-pendo'));
```

CURRENT STATUS

Completed: 6/9 features working 

- SMS Content Tracking
- Board Card Quick Actions
- Search Input Field
- Sort Dropdown Options
- Hashtag Link Updates
- Backend Routes

Remaining: 3/9 features need fixes 

- Sign-Up Page Buttons (Squarespace script)
 - Modal Backdrop Fix (wrong CSS selector)
 - Social Media Embeds (missing data-pendo)
-

PRIORITY ORDER

1. **Modal Backdrop** (Critical) - Blocks all modal tracking
 2. **Sign-Up Page Buttons** (High) - Key conversion tracking
 3. **Social Media Embeds** (Medium) - Engagement tracking
-

Once these 3 items are fixed, Pendo implementation will be 100% complete!
